WorldWater and Solar Technologies, Corp.
200 Ludlow Drive
Ewing, New Jersey 08638

Dear WorldWater:

The Morrell Foundation would like to acknowledge the performance of the Mobile MaxPure water purification unit, designed and manufactured by Worldwater and Solar Technologies, Corporation. This unit was donated for use in Waveland, Mississippi after Hurricane Katrina hit the Gulf Coast in 2005.

The Mobile MaxPure unit operated flawlessly for the seven months it was deployed in Waveland. During this time, all potable water for the thousands of people at our relief camp, came from this unit, including water for drinking, cooking, showering and cleaning. The Mobile MaxPure never let us down. It met or exceeded all advertised performance expectations.

Our relief operation benefitted greatly from the use of the Mobile MaxPure unit and it dramatically improved the quality of life for the people of Waveland, Mississippi. In addition, by operating solely on sunlight, your unit simplified the fuel logistics for the water supply.

Sincerely yours,

Alan H Morrell
Director
Morrell Foundation
